Introducing a Beko state of mind. A feeling you get knowing that your health, finances and emotional well being are well balanced and working for you.

You see at Beko, we promote that holistic confidence throughout our business and across our products.

From innovative technology ensuring your vegetables stay fresher and nutritious for longer, with our unique HarvestFresh.

What's more, our rough and rigorous stress tests maximise reliability, meaning we take the strain - so you can be confident your home doesn't have to.

That's a **Beko** state of mind.

HARVESTfresh™

Inspired by nature, powered by light

Even though they keep looking fresh, fruits and vegetables start to lose their vitamins when placed in the fridge. Thanks to innovative HarvestFresh™ technology, vitamins are preserved for longer*. Unique crisper technology developed for Beko fridges uses not one, but 3 efficient colours, that mimic the 24 hours sun cycle and natural sunlight. All of this so you can enjoy nutritious meals and a healthier lifestyle.

*Tested by Intertek based on Vitamin C and Vitamin A measurements in tomato, green pepper, carrot, spinach and celery directly exposed to the light technology compared to Day 0 conditions over a 5-day period.

AEROflow™

Gentle air distribution for lasting freshness

Nature put its own expiration date on its gifts. The appearance and shape of food is related to its freshness, and keeping this freshness for longer requires gentle care, just like in nature. Now, Beko's gentle and even care for food inside the fridge offers long-lasting freshness. With less direct cold air blowing on fresh food, less dehydration occurs. The innovative Beko AeroFlow™ cooling system minimises temperature fluctuations inside the fridge and reduces temperature differentiations between shelves with surrounding gentle air distribution for lasting freshness. Since longer freshness of nutrients is a key element of healthy living, AeroFlow™ technology takes care of food inside the fridge in a gentler way. It surrounds food with evenly distributed cold air to keep them fresh, vivid and juicy for longer.

Fruit and vegetables fresh up to 3 times longer

Beko EverFresh+® technology in your fridge is perfect for anyone who wants to live healthier, like a pro! People whose lifestyles revolve around healthy fruit and vegetables. Now, your fruit and vegetables won't go off after just a few days, they can sit comfortably in our special crisper compartment, staying fresh for up to 3 times longer*. The compartment's humidity is precisely controlled, and condensation is reduced via air channels, temperature variations are minimised, so your fruit and vegetables stay crisp and fresh. All this means that, thanks to Beko EverFresh+® technology, your fresh food is just as tasty as it is healthy for longer.

*Tested by SGS (compared to standard crisper for broccoli and lettuce)

IonGuard®

Get rid of bacteria for long-term food storage

You need fresh air inside the refrigerator, but don't want to check it every day. The active ioniser neutralises bacteria, viruses and particles in the refrigerator by using negative ions. It allows the air inside the fridge to circulate and stay clean so food can be stored for much longer.

ProSmart™ Inverter Compressor

✓ High Efficiency

✓ High Durability

✓ Low Noise Levels

High efficiency, high durability, low noise

Don't pay lots of money for electricity bills just for a refrigerator that does the job. You can open the door as many times as you like, ProSmart™ Inverter Compressor technology will adapt and create fewer temperature variations, provide faster cooling with less energy, and allow your food to stay fresh for much longer. The compressor's design provides more durability while being 4 times quieter.

MultiZone

Fridge to freezer with one touch

No matter what's on your shopping list, the flexible MultiZone compartment gives you extra freezer or fridge space instantly for you to organise however you want. Adjust the temperature from -24°C to 10°C with the touch of a button and never worry how you'll squeeze in all that stuff from the store into the refrigerator. Use the door rack as much as you need.

Vacation Mode

Extra energy saving during vacation

Vacation mode brings you an extra energy-saving option. Only the freezer compartment stays on, thus saving energy.

LED Illumination®

Even and efficient illumination

LED light covers the whole of the fridge, so you can find everything easily with less stress and energy. LED light on the ceiling of the fridge and LED strips on the side walls illuminate every shelf separately and provide full lighting on every part of the unit.

Twist & Serve Ice Cube Tray

Easy access to ice cubes

No more trying to pry ice cubes out of tiny spaces, causing stress and annoyance. The ice cube tray provides easy access to ice cubes so they easily drop into the tray with a simple twist.

Fast Freeze

Faster freezing for warmer pots

Putting warm pots into the fridge may cause other foods to spoil. To avoid this, a fan on the back wall blows cold air right onto the items placed on top, freezing them 10% faster compared to lower freezer shelves.

High Capacity Refrigerators

Maximum space for big families

Big modern families need a lot of different foods to store. Beko high capacity refrigerators beautifully combine state-of-the-art design and functionality to offer maximum flexibility and ease of use. The high level of technology allows them to provide the ultimate freshness solutions for a healthier lifestyle.

Reversible Door

Adjustable door direction to fit your kitchen layout

Some kitchen layouts require that refrigerator doors open in one direction and not the other. Reversible Door allows door hinges to be placed on both the left and the right of the unit, so decide which way your fridge doors open. Plus, you can double your cooling capacity by placing two fridges side by side and reversing the doors of one.

- Top Load Washing Machine
- Twin Tub Washing Machines

Steam-infused stain treatment

Admit it - you feel compelled to pre-treat laundry whenever you see a stain. SteamCure technology does the work for you, applying steam to the stain before the wash, softening up dirt and making it easier to remove. It also helps to reduce wrinkles, so put away that iron - you've got less to do both before and after the wash now.

AQUAtech™

Half the time, twice the care.

Beko AquaTech™, a groundbreaking washing technology, replaces drum movement with power of water. Using the strength of water in this way saves time up to 50% without sacrificing any of the washing performance. Plus, up to 50% gentler to your clothes compared to conventional fast programs. Beko AquaTech™ premixes water and detergent and sprays the mixture directly onto fabric. This ensures proper penetration into the textiles and ensures a thorough wash. This new technology of Beko is a huge time-saver and ensures textiles are treated gently.

AutoDose

Optimum detergent, efficient cleaning

Don't worry about using enough detergent, or even adding it before every wash. Just fill the liquid detergent and softener and let AutoDose sensors automatically dispense just enough of both, based on the type of fabric, load size and water level of each wash. The result? Effortlessly clean clothes every single time, without the constant hunt for the bottle of detergent.

We use recycled plastic bottles*
for a healthier planet. Join us to
make a change.

Recycled  Tub

*In the production of washing machine and washer dryer tubs,
overall ~398 tonnes of recycled PET bottles were used in 2019 & 2020

Recycled  Tub

There are many things that nature calls her own. PET, the main material that goes in plastic bottles and hundreds of other modern materials, is not one of them, being solely responsible for millions of tons of waste that nature can't ever break down. In our drive to help the planet, we used 398 tons* of recycled plastic bottles in 2019 & 2020, transforming them into a durable, high-performance material that goes into the build of Beko's RecycledTub™ washing machines and washer dryers. So you get the highest level of performance and durability while the planet breaths a little easier.

SteamTherapy®

Reducing wrinkles, shortening ironing time

No one enjoys ironing. Beko SteamTherapy® reduces wrinkles up to 58% in your laundry. Load a kilogram of clothes in your washing machine and the steam generator will inject intense steam into the drum to release the creases from cottons, synthetics and blended fabrics, all in the same cycle.

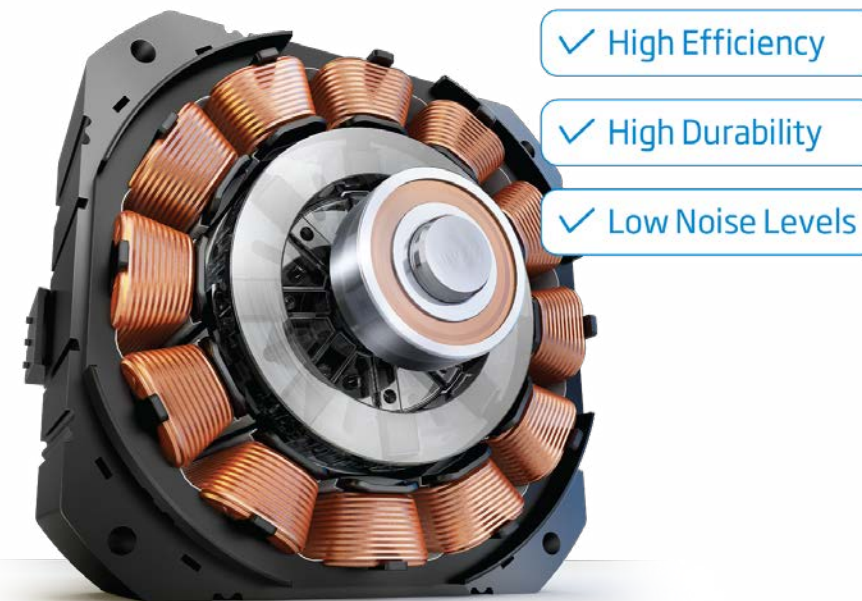

Homewhiz

Quick and smart program suggestions for your laundry

Stains and stress are gone forever with the most convenient washing machine yet. Now your washing machine tells you the programme you need for you!

ProSmart™ Inverter Motor

High efficiency, high durability, low noise levels

Don't stress about your energy bill or give yourself a headache every time you wash your clothes. Thanks to its brushless motor design, ProSmart™ offers superior energy efficiency, lower sound levels and higher durability - all in a single machine, so you get the most from your machine without disturbing your monthly budget or peace of mind.

Stain Expert

Spotless cleaning for 24 types of stains

Put the white vinegar, the lemon juice and the dish soap away. They belong in the kitchen and your stained clothes belong in a washing machine with StainExpert Programme. Whether it's coffee, ketchup, chocolate, makeup or blood, StainExpert is designed specially to get rid of 24 different kinds of stains so you won't have to pre-treat any stain anymore.

Aquawave

Wave-like drum action for gentler treatment

Washing might take its toll on your clothes. So, here is AquaWave system's curved door glass and specially designed paddles that move the laundry in a wave-like action inside the drum, treating clothes gentler and improving the washing performance. Next time someone compliments your clothes and you reply, 'What, this old thing?' you might be telling the truth.

Xpress super shot (14')

2 Kg of clean laundry in 14 min

Not all clothes require an intensive wash. Sometimes, a quick wash will do the trick. Xpress Super Short 14 Min Programme allows you to wash up to 2 kg of laundry in just 14 minutes. 2 kg might not sound like much but that's like 20 t-shirts! That's more than enough to get you out the door.

Daily express

Full capacity cleaning in 28 minutes

Sometimes you need a short and effective washing programme for a full load. Beko Daily Express is a daily program that can wash a full load of laundry in just 28 minutes at 30 °C, so it can be in and out the machine as quick as a flash.

SilentTech™

Quiet and peaceful

We know what it's like when you need to do a laundry but you're worried the noise will wake the kids. Beko SilentTech™'s noise blocking technology keeps the washing noise to just 45dBA* with its enhanced noise insulation in the cabinet, specially developed S shaped side wall design and an algorithm to prevent unbalanced loads.

Fast+Function

Faster cleaning

With the push of a button, you can shorten the length of programmes by up to 55%, so now the washing can go as fast as you want it to.

DarkWash /Jeans

No detergent residue

Nobody likes it when detergent residue leaves unwanted and ungraceful white marks all over your jeans. Beko's Dark/Jeans programme uses extra water, both during the washing and rinsing cycles, to make sure absolutely all detergent residue is removed from your clothes.

Outdoor / Sports Program

Waterproof fabric protection

You're constantly cleaning and recleaning your sweaty clothes, running the risk of damaging them from the constant washing. Not anymore. Beko's Outdoor/Sports program uses a low tumbling action that prevents friction within the drum, helping your clothes retain their waterproof features and breathability up to two times longer than with a conventional program. That's twice as many workouts!

XL Door

Ergonomic bigger door

Selected Beko washing machines feature extra-large porthole doors. Even the bulkiest laundry like duvets, sheets, and bathrobes can be easily loaded through the enlarged door.

GentleCare™

Keeps cottons safe

Your favourite clothes need more care. Beko's GentleCare™ program washes your cotton clothes more gently, helping to protect their texture and colour and making sure they last longer. It also uses just half the energy of a 40°C wash*.

*Tested by 3rd party laboratories

Duvet/DownWear Program

Fluffy garments protection

Are your precious garments going to lose their fluffiness when you wash them? Not on our watch! With Beko's Duvet/Down Wear program in your washing machine, you can now wash your favourite down feather coats and duvets with the ultimate care they deserve. Thanks to a special spinning cycle, they won't lose any of their volume or cosiness.

Baby protect +

This 99.99% hygiene approved program offers a super rinsing cycle so that your little one's clothes aren't exposed to any dust or germs whilst they're being cleaned and become anti-allergic. The hygienic rinses mean that you can relax and know that thanks to Beko Baby protect+ program there's nothing left to bring your baby out in a rash

DrumClean Program

Hygiene for your machine as well

Your washing machine will get the proper treatment with a special hygienic cleanse involving rinsing it in water heated up to 70°C with our DrumClean program. The program only operates when the drum is empty and ensures that there is no residue left behind in the machine.

Woolmark® Apparel Care

Ultimate wool care

You probably hesitate to wash your wool garments in the machine. Luckily, Beko washing machines have Woolmark® Apparel Care registration which takes care of your machine-washable precious wools.

OptiSense®

Optimum wash with smart sensors

OptiSense® technology in your Beko washing machine optimises the water, detergent, energy and also time consumption. 3 smart sensors automatically monitor your laundry, 1 extra smart sensor looks after your machine, helping it to last longer.

Auto Program

Sense which fabric and selects program accordingly

Washing your clothes can be easier than you imagine. Beko Auto Program will automatically work out what type of fabrics you've put in, how many clothes there are and choose the right washing program - cotton, synthetics, blended, all done!

Hygiene+ Program

Hygienic cleaning at any temperature

With Beko Hygiene+ Program, you can get premium hygienic cleaning results for all your laundry at any temperature (20°C - 90°C) with custom drum movements, sensitive temperature control and additional rinse and spin cycles. The 60°C cycle eliminates 99.9% of allergens and approved by Allergy UK.

Drum Light

Perfect illumination

Beko washing machines have a drum light which perfectly illuminates the inside of the drum, letting you see inside better and allowing you to make sure you're not leaving any items inside.

Wash&Wear®

1 kg in 1 hour

Was that date really today? You've got no clean clothes, your lucky top is in the dirty basket and you've got to catch the train in an hour. Fortunately for all of you last-minute-date types, the Wash & Wear® program in your Beko washer dryer can get a shirt washed and dried in the machine in barely no time at all. Choose from temperature settings of cold- 20°-30°C and get up to 1kg (5 shirts) washed and completely dried in an hour. You go in the shower, your favourite shirt goes in the wash.

5kg Wash&Dry

5kg Laundry on one go

Beko washer dryer will allow you to wash and dry up to 5 kg of laundry in one go. The program automatically adjusts the settings to achieve perfect washing and drying results.

Hygiene+ Wash & Dry Program

Hygienic cleaning at any temperature

With Beko Hygiene+ Program, you can get Premium hygienic cleaning results for all your laundry at any temperature (20°C - 90°C) with custom drum movements, sensitive temperature control and additional rinse and spin cycles. The 60°C cycle eliminates 99.9% of allergens and approved by Allergy UK.

TUMBLE DRYERS

- 1 - 10kg Heat Pump Tumble Dryer
- 1 - 9kg Condenser Tumble Dryer
- 1 - 7kg Condenser Tumble Dryer

IRONfinish

Ironing technology inside, ready to wear* clothes outside!

Ironing your clothes everyday can be tiring. Beko's IronFinish Dryers take care of the hassle for you, getting your clothes completely dry and ready to wear. It even works the same as a regular iron, infusing water and steam into your clothing for the ideal time at the ideal temperature, so fabrics come out smooth and ready to wear, just as if you'd ironed them! Let your dryer do your ironing for you so you can get on with the more important things in life!

*Ready to wear results from independent testing obtained for casual shirts with 100% cotton, 100% polyester, 100% viscose and 56% cotton-44% polyester blend in the iron finish programme. Irons up to six shirts in one cycle.

- 4 Program Dishwasher

HygieneIntense

Purifying Power of High Temperatures for 99.999 % Hygiene

As we all get more used to eating at home all the time, you've probably noticed that the dishes begin to pile up, particularly in larger families. Our research indicates as well that people trust dishwashers more than washing by hand both to get their dishes cleaner and to take away all that hassle.

Inspired by the purifying power of hot springs, our new Hygiene Shield Line Dishwasher provides bacteria & virus* elimination for your dishes in a safe and convenient way at home.

The steam mist rises up from these high temperatures to cover every inch of the dish. Then the dishes are rinsed with purifyingly hot water. All this means that 99.999% of bacteria and viruses* are completely eliminated for perfectly hygienic results.

*Killing: Enterococcus faecium, Bovine Coronavirus, Murine Norovirus

AqualIntense®

Intense cleaning performance for the dirtiest dishes

Stubborn dirt and hard-to-clean dishes? No problem! AqualIntense® creates a powerful cleaning zone with intense water pressure and offers up to 5 times better cleaning performance, so even the toughest pots and pans get a thorough clean. No matter what you put your cookware and dishes through in the kitchen, with AqualIntense®, they'll come out spotless every time.

*Tested by internal laboratories on an intensive 70°C program.

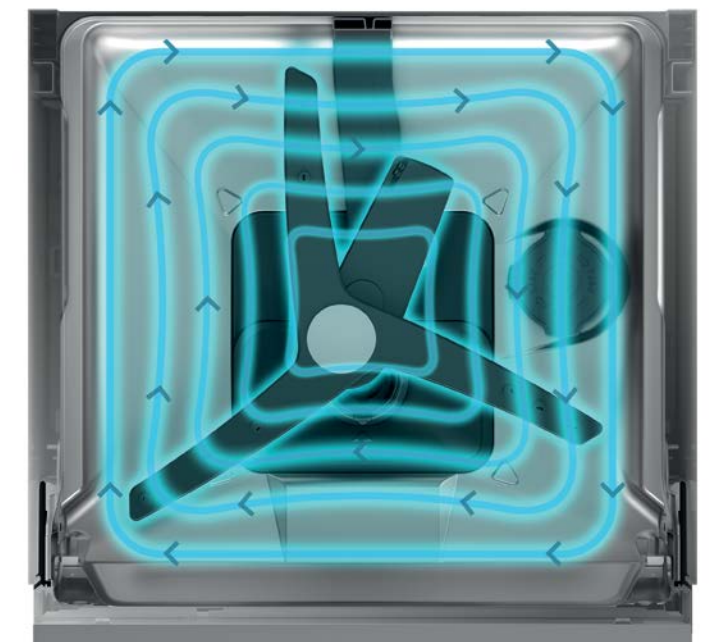

CornerIntense™

Special spray arm design to reach every corner

Ever noticed how some dishes don't get as thoroughly cleaned as others? That's because dishwashers are rectangular in design while most conventional spray arms move in a circular motion. As a result, dishes or glasses close to the corners of baskets do not get enough water and detergent. Beko CornerIntense™ dishwashers feature an innovative spray arm design and motion so that water and detergent reach every spot, even the corners.

The right amount of detergent for efficient cleaning

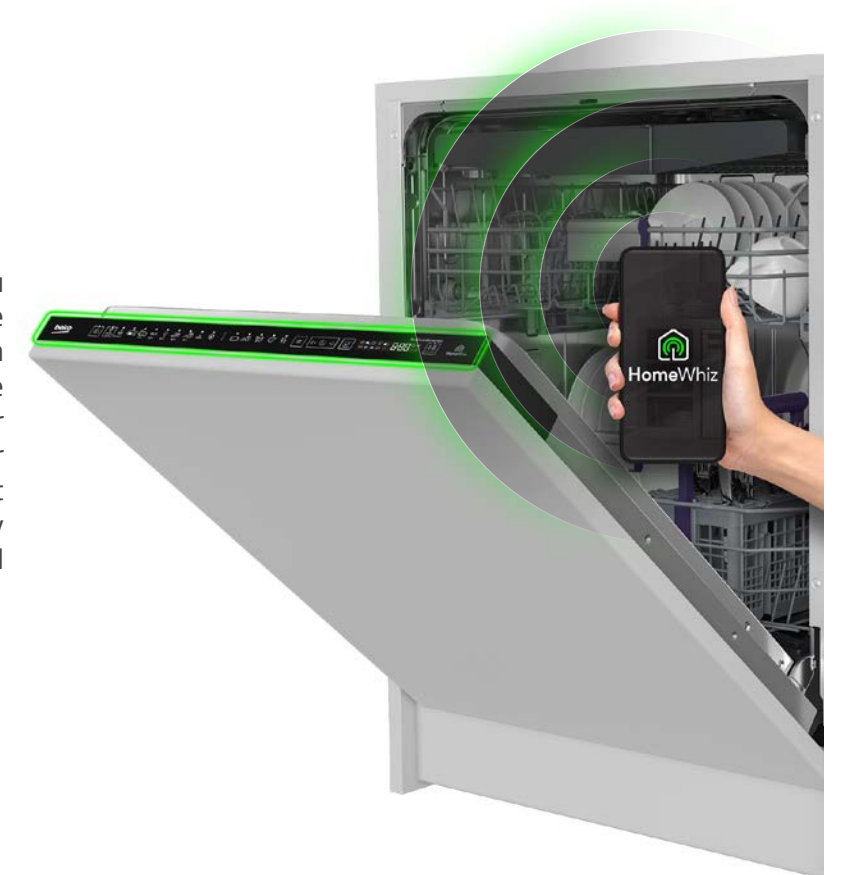

No more guesswork over how much detergent your dishwasher load's going to need! Beko is launching 1st dishwasher in Europe with AutoDose technology*. Just fill the detergent tank up to 1 month, and let the AutoDose sensors dispense just the right amount of detergent for sparkling clean dishes every time, whatever program you choose. If you prefer tablets or powder, you can bypass the AutoDose function too. If you've got a smart dishwasher with HomeWhiz® technology, you can use the HomeWhiz® app to automatically order detergent and rinse aid when your cleaning materials is running low. That's another thing taken care of!

*For household type only.

Let your dishwasher tell you which programme to load!

As you type in the size and type of load you need, your dishwasher's Wizard feature offers you a set of options to choose from depending on whether you want the most eco-friendly option, the fastest, or a standard wash. It's now easy to let your dishwasher tell you the perfect way to get your dishes as clean as possible in the way that makes the most sense for you and your family.

ProSmart™ Inverter Motor

High efficiency, low noise

Want to save on your electricity bills and have a quieter, more efficient dishwasher? The ProSmart™ Inverter Motor in your Beko dishwasher reduces friction and is twice as quiet*. With ratings of up to A+++, it'll help you save on water and electricity too.

* Tested by internal laboratories.

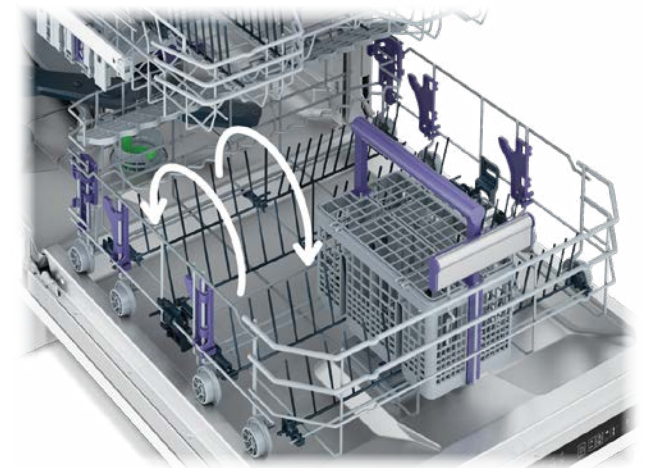

- ✓ High Efficiency
- ✓ High Durability
- ✓ Low Noise Levels

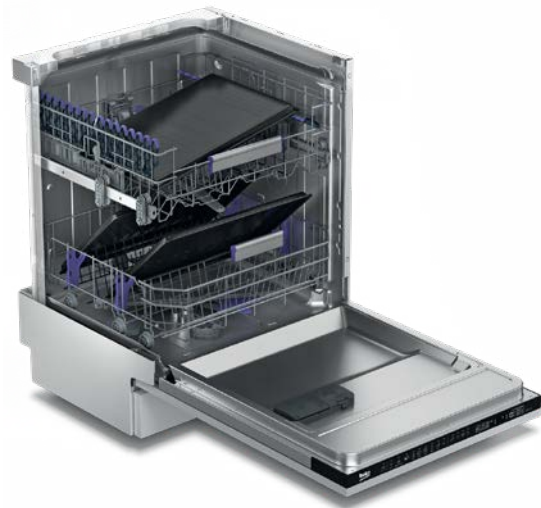

Easy Fold Plate Support

Folding tines

Lower basket plate support tines can be easily folded away to create space for large pots and pans.

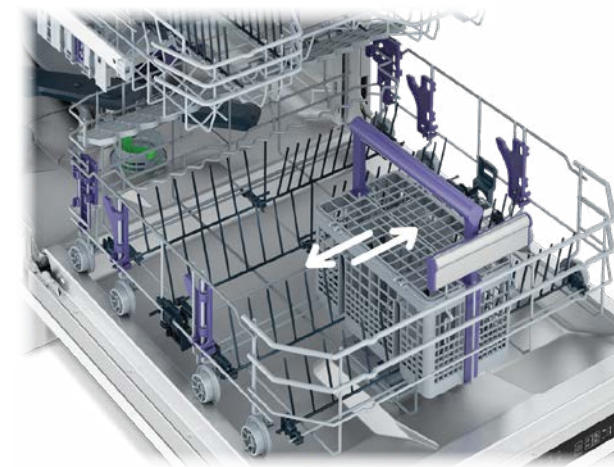

TrayWash™

Effortless cleaning with TrayWash™

The TrayWash™ feature incorporates a special design that lets you place and secure two trays in the lower basket, and one in the upper basket. Plus, the high-pressure TrayWash™ function gets your trays looking as good as new.

Sliding Cutlery Basket

Cookware game

The cutlery basket's improved flexibility helps you organise the dishes in the lower basket more easily.

3 Position Acrobat System

Flexible loading options

The upper basket of Beko Dishwashers now features a 3-position loaded adjustment mechanism, so you can load different sized dishes easily. So, no matter how big your serving plates are, loading them into your dishwasher won't be a problem.

Fast+ Function

Clean dishes and glasses in a flash

Sometimes you don't have time to wait for a full wash cycle to run before you have clean plates and glasses. The Fast+ function makes the washing cycle faster up to 3 times* with optimum performance, meaning you can wash and serve in no time at all.

*Tested by internal laboratories.

FlexiDrawer®

Flexible enough to suit you

The cutlery tray in Beko Dishwasher is now fully flexible. With 5-position adjustment, it allows enough space for longer stemmed glasses in the basket below.

Quick&Shine®

Perfect cleaning in just 58 minutes

Quick & Shine® is a unique program that guarantees exceptional cleaning and drying performance on soiled dishes. The program cleans and dries your dishes in just 58 minutes and provides perfect shine.

Auto Program

Take the guesswork out of choosing your program

Beko's Auto Program smart sensors detect how soiled your dishes are and determines the optimum wash cycle automatically. This means your dishes come out sparkling clean using just the right amount of water and energy.

AquaFlex®

Flexible washing for different materials

AquaFlex® technology provides efficient and gentle washing at the same time. It adjusts water pressures to the lower and upper baskets, providing excellent washing and drying results for all kind of dishes, even plastics.

Clean&Shine™

Clean and dry in no time at all

The Clean & Shine™ program provides superior washing and drying performance, not only for lightly soiled items, but for normally soiled pots and dishes as well, in just 90 minutes.

Eco 50°C Program

Eco-friendly washing

A program that cares for the environment as well as your dishes! The Eco 50°C program uses reduced amounts of energy to clean a full load of normally soiled dishes.

Flexible Half Load

Why wait to be fully loaded?

The Flexible Half Load option allows you to load the upper and lower racks separately for easy and economical washing. So, now there's no need to wait for both racks to be fully loaded before you run your dishwasher!

Ultimate Glass Care

Full protection for glassware

Beko Ultimate Glass Care is a suite of features that cleans and protects glasses to the highest standards. Auto GlassShield® protects glassware from cloudiness and dullness, extending lifetime by up to 20 times compared with other dishwashers. Shininess is guaranteed with SteamGloss®, which increases shine by 23%* on glassware and by 30%* on china. The Ultimate Glass Care 40°C is a special program designed for glasses, gently washing them at 40°C. With its special modular design, the Beko's SoftTouch® accessory keeps up to 4 wine glasses of different sizes safe during a wash cycle. The basket is lined with SoftTouch® material to provide gentle holding. If you've got a lot of people to host, you can use extra modules to wash up to 30 glasses at once. Ultimate Glass Care 40°C and the SoftTouch™ accessory work together to keep your wine glasses as clean and shiny as the day you bought them.

Time Delay

Timed to perfection

With the Time Delay function, you can delay your wash cycle by 3, 6 or 9 hours, and up to 24 hours on some models. This means you can plan your wash times to suit you, and take advantage of cheaper electricity rates at nights.

Fingerprint Free Stainless Steel

Easy-care surfaces

Thanks to a special coating on the stainless steel surfaces of selected models, your dishwasher always looks clean, shiny, and fingerprint-free.

Child Lock

Safe for little hands

Wandering little hands have a tendency to cause mischief, so the Child Lock feature prevents any settings being changed mid-cycle should a button be pressed or a dial be turned

Auto Tablet

The best drying results

The Auto Tablet sensor detects the amount of rinse aid and sets the duration of the drying cycle. This means you get the best drying results without having to lift a finger.

PizzaPro™

Pizzeria-style pizza in just 5 minutes

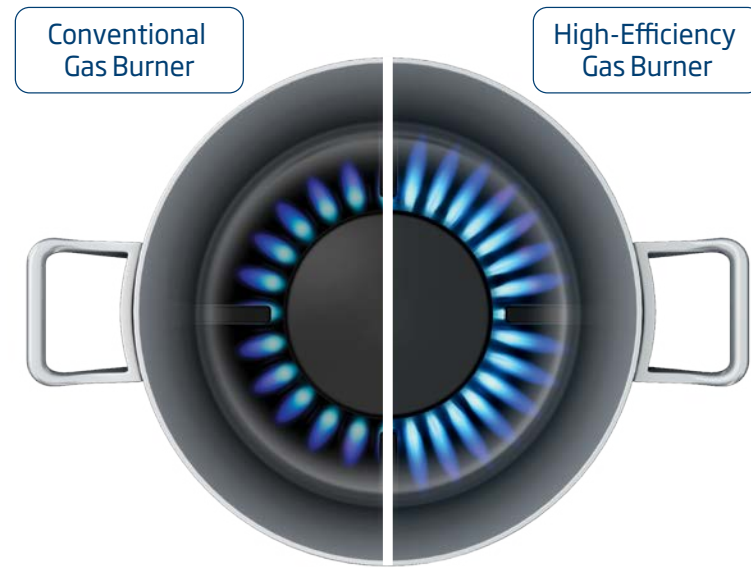

For pizzeria-style pizza at home, Beko's PizzaPro™ gets the oven temperature up to 310°C, giving the pizza a crispy crust while keeping the toppings nice and juicy. With the pizza stone, your pizza is ready in just 5 minutes. Plus, a temperature as high as that works for other dishes as well.

High-Efficiency Gas Burners

Faster and more efficient cooking with special burner design

Don't let a busy day cost you a healthy meal. Now you can cook every meal faster and more efficiently on the hob. High Efficiency Gas Burners use less gas and cook more quickly than standard burners. So even when you're short on time, you can put your favourite meals on the table fast.

SoftClose® Door

Smooth and quiet

When your hands are full trying to get a tray full of food in the oven, it can be tricky keeping the oven without it slamming shut. The SoftClose® feature in Beko ovens uses newly designed hinges to make sure oven doors close softly and quietly.

TwinFan™ Cooking

Cook more in no time

If you're cooking for a crowd and are running out of time, this feature is here to help. Beko's TwinFan™ technology enables you to cook large portions up to 112 L in no time. The dual fans spread heat evenly throughout the oven, and provide better air circulation, giving you faster preheating and cooking times compared to single fan ovens.

SteamShine® Cleaning

Dissolve grease and stains

Forget about scrubbing and scraping grease and burnt-on food from your oven. With Beko SteamShine® Cleaning, your oven does the hard work for you. Simply pour some water into the tray, and as the water evaporates, it softens food leftovers in your oven, making it easier to clean.

Telescopic Shelves

Safe and easy pull-out

If you don't want to ruin the moment by struggling to get your culinary creation out of the oven, Beko's telescopic shelves will help you retrieve heavy dishes from the oven safely and easily. The full extension telescopic shelf comes out of the oven completely for maximum ease, while partial telescopic shelves come 2/3 of the way out.
