7kg Sensor Controlled Vented Dryer

Optisense® Technology - Preventing over-drying, our sensor drying programmes identify the level of moisture in the drum and automatically stop the cycle when the optimal dryness level has been reached. As well as saving you time and money, your laundry will benefit from better care and protection.

Auto AntiCreasing - Perfect for those days when you can't unload your laundry right away, our automatic anti-creasing function rotates the drum periodically for up to 2 hours after a cycle has finished, separating your laundry to minimise creases.

Reverse Drum Action - If you're tired of unloading messy heaps of laundry, our reverse action drum can help. By separating your garments as they're drying, the drum helps to reduce creasing.

Delicate Program - You can dry at a lower temperature your very delicate laundry (silk blouses, fine underwear, etc.) that are suitable for drying or laundry which is advised to be hand-washed.

Child Lock - The child lock option can be activated to prevent children from tampering with the buttons. Activating the child lock option prevents any change from being made to the selected program
