Turkish Coffee Machine

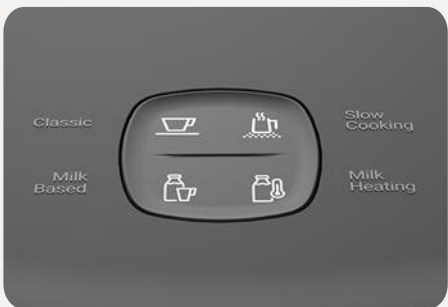

Features

Turkish Coffee With Milk

Offers versatility in brewing, allowing users to prepare traditional Turkish coffee or indulge in a milky treat.

Versatile Brewing Modes

Various brewing options are included which are Slow Brewing, Milk Heating, Classic Brewing, and Hot Chocolate modes to cater to different preferences.

Hot Chocolate Option

Introduces the authentic preparation of Hot Chocolate with the Milk Based Program.

Large Capacity

Offers large-scale brewing with our Turkish coffee pots, providing a generous 5 cups for traditional Turkish coffee or 3 cups for the creamy delight of Turkish coffee with milk.

Ceramilk®

Helps prevent the milk from sticking to the base of the pot, makes cleanup easier and ensures a smoother preparation process.

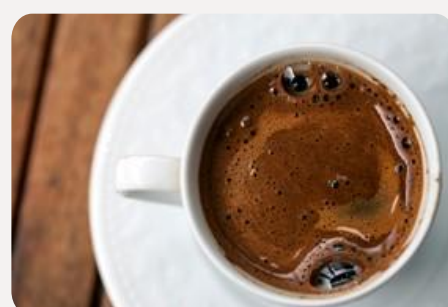

Milk Heating Option

The Milk Heating Option specifically caters to the needs of families with little ones, provides the convenience of heating to a gentle 75°C~ without boiling, thanks to pasteurization.

Anti-Spill Technology

An additional safety system that eliminates the need to wait beside it while brewing coffee.

Cook Sense Technology

Terminates cooking when the coffee foam reaches the ideal level with its sensitive foam detection system.

Light & Audio Alert

Enhances awareness and adds convenience with light and audio alerts.
