85 L Multifunction Aeroperfect™ 60 cm Built-in Oven with Airfry and Pyrolytic Cleaning

Aeroperfect™ Technology - Bake perfect cupcakes, roast a delicious Sunday dinner or use the grill to make a hearty but healthy breakfast. Aeroperfect™ technology provides uniform hot air distribution throughout the oven and minimises temperature fluctuation, ensuring even and precise cooking every time.

Airfry Technology- Beko AirFry technology integrates an airfryer in the size of your oven! This oven evenly distributes heat, using powerful heaters, and a high-speed fan system. The special AirFry accessory circulates hot air, making food crispy outside and soft inside, without the need for much oil. With this function and accessory, who needs an extra appliance?

Meatprobe - Don't let undercooked or overcooked meat spoil your day. With CookSense® you no longer have to guess how long the meat has to roast in the oven. You simply insert the probe into the meat and attach the device to the oven wall. It measures the internal temperature and tells you exactly when the meat is rare, medium or well done, so that the result is always perfect.

Pyrolytic Self Cleaning- Save time in the kitchen with our ovens that clean themselves at the touch of a button. The oven heats up to a super-hot 480°C, burning away dirt and grease, and then all you have to do is use a damp cloth to wipe clean.
