8 kg Sensor Controlled Heat Pump Tumble Dryer

Hygienic Drying - The Hygienic Drying Program provides a deep sterilisation of your laundry killing the presence of live house dust mites and pollen. This sterilisation is possible due to the high temperature in this program, offering perfect drying cycles to protect your little one's clothes and delicate skin.
Approved by Allergy UK

Reverse Drum Mode - Less tangling means more even drying. The Reverse drum mode is a dedicated function that can be selected before or after the program starts. When activated the reverse tumbling frequency increase to provide better evenness of drying. This option is recommended for large or long items like bath towels, sheets, doona's and trousers to reduce the tangling and twisting.

Eco Gentle™- EcoGentle heat pump technology means you can dry without draining the colours - or your bank account. Drying at a lower temperature (60°C with EcoGentle™ heat pump instead of 110°C with an AV condenser) it is gentler on your clothes and more energy efficient.
