

Can a brand-new line of dishwashers revolutionize the way we think about cleaning dishes?

888.352.BEKO (2356) | beko.com/us-en/

 Printed on recycled paper. ©2022 Beko U.S., Inc.

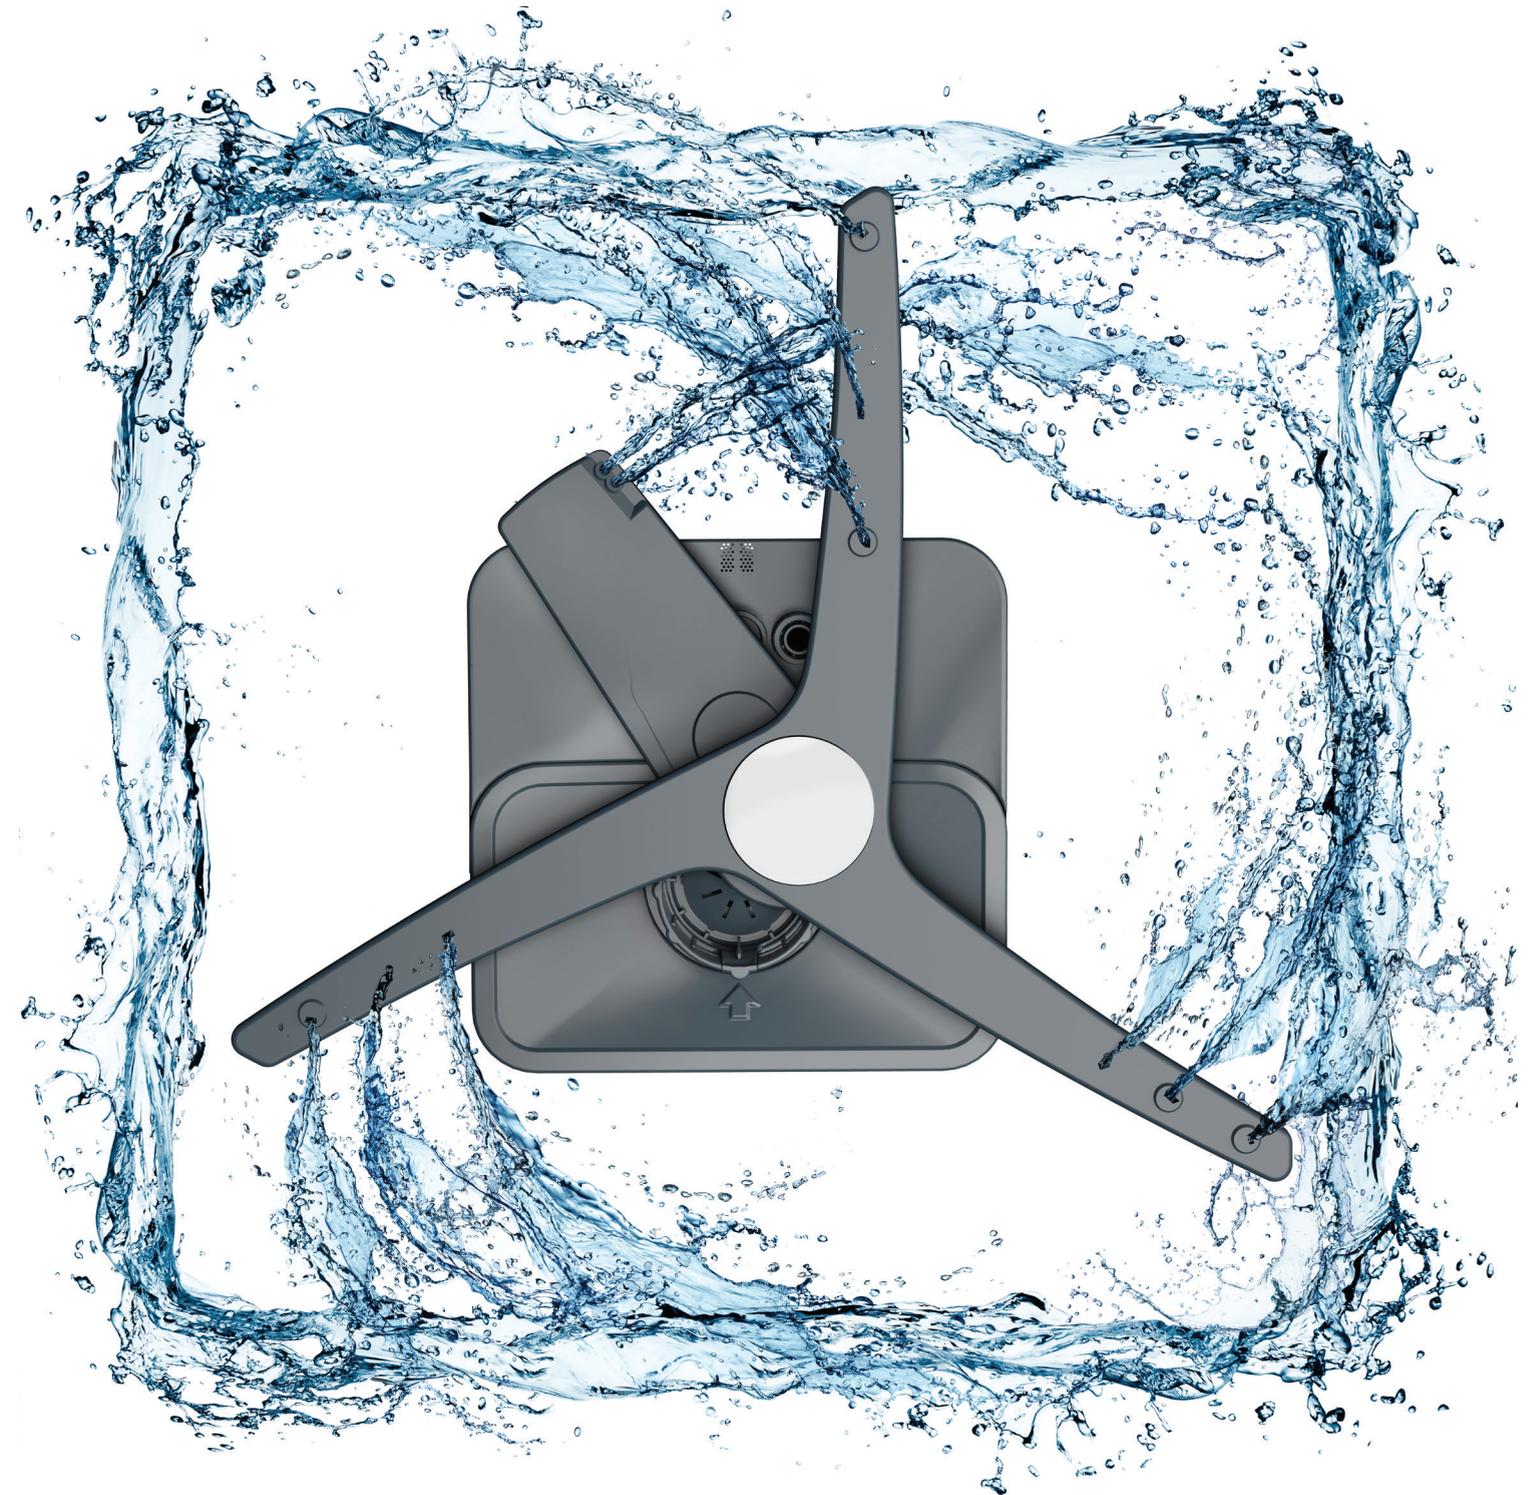

A woman with dark hair in a bun, wearing a white ribbed sweater and white pants, stands in profile holding a small cup. She is positioned behind a kitchen counter with a thick wooden top. Below the counter is a white dishwasher with a black control panel. On the counter, there is a white teapot, a small bowl, and lemons. The background is a large window overlooking a misty forest of evergreen trees.

Cleaner dishes. Cleaner planet. Cleaner conscience.

At Beko, we believe a truly revolutionary product is one that redefines what is possible in terms of performance. Secondly, it must achieve that performance while using the least amount of natural resources possible. And finally, it needs to be priced within reach of everyone who wants to lead a healthy and sustainable life. The revolution in dishwashing is about to begin.

Introducing CornerIntense.®
The most significant breakthrough in dishwasher
technology in nearly 100 years.

**Most revolutionary ideas don't happen by thinking inside the box.
But there's a first time for everything.**

Since 1929, the dishwasher as we know it has featured round sprayers in square tubs. But now, Beko has found a way to challenge a century of "that's the way it's always been done" with a spray arm that travels to every corner of the dishwasher.

We call our remarkable new way of washing dishes CornerIntense.® Instead of a spray arm rotating on a fixed axis, the Beko CornerIntense® spray arm rotates on a movable axis. Jets of water continually move in more than just one fixed pattern, to completely cover every part of the dishwasher.

It cleans dishes like never before, while using half the water and two-thirds the energy.* And it's the cornerstone technology of the 2022 Beko dishwashers.

*Beko was launched in 1955
and is now sold in 140+
countries. We are the leading
home appliances brand in
Europe and No. 1 large home
appliances brand in the UK,
France and Poland.*

*As compared to US Federal Standards for dishwasher water and energy usage.

The old way of washing dishes. A round sprayer in a square enclosure. See the problem?

The new Beko way of washing dishes. A spray arm that travels in a square pattern. Now that makes more sense.

**Cleaning the filter often gets overlooked.
But not by us.**

CornerIntense® isn't the only way we've improved dishwashing. New EverClean™ Filter automatically rinses the filter with pressurized water to remove food residue and debris, keeping the filter clean up to four times longer. No need to manually clean the filter as often, for continued dishwashing performance. That means more time spent enjoying brilliantly clean dishes, and less time worrying about the filter.

Beko is the only home appliance brand to be honored by the EPA for its commitment to environmental protection every year they've done business in America.

Deep clean bottles like hands never could.

Our new DeepWash™ technology brings three water-adjustable jets that deliver increased water pressure to a dedicated wash zone. It easily handles several tall bottles or jars with narrow openings, or a larger item. Extra-dirty, meet extra-powerful.

1. Three adjustable water jets create a powerful wash zone.
2. Grippers hold items securely.
3. Cleans narrow bottles or extra-tough pans up to 12" deep.

Beko's parent company Arçelik has more than 40,000 employees, and 28 factories in 9 countries.

These factories have reached a Carbon-Neutral status in 2019 and 2020 with their own carbon credits.

One less step on the road to perfection.

SelfDry™ is a new auto door-opening system that unseals and opens the door of the dishwasher after the program has finished, letting ambient air in and drying dishes naturally without the use of additional energy.

And thanks to our NSF-certified Sanitize feature, Beko washes dishes to be a safe and healthy 99.9% bacteria-free.

In 2021, Arçelik achieved the highest score in the DHP Household Durables category for the 3rd year in a row, in the Dow Jones Sustainability Index of the S&P Global Corporate Sustainability Assessment.

More reasons to love Beko dishwashers.

Exceptional silence.

Beko dishwashers are as quiet as 39 dBA. A convenient red light shines on the floor when our ultra-quiet dishwashers are running.

IonGuard™ odor eliminator.

An eco-friendly ionizer eliminates any potential odors without using any planet-harming and people-harming chemicals.

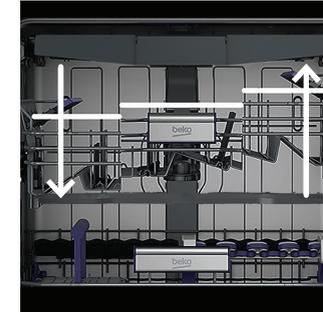

Stainless steel interiors.

Every Beko dishwasher has a worry-free, stainless steel tub. It resists rust, hard water spots, allows higher water temps and reduces noise.

Full size third rack.

The removable third rack gives you extra capacity and ensures cutlery doesn't nest, while still allowing for glasses and bowls in the middle rack.

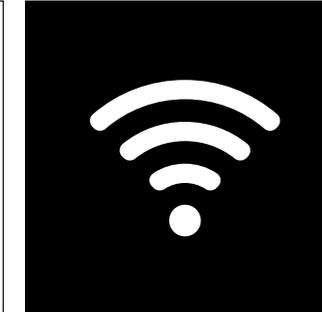

Adjustable rack.

The middle rack is height-adjustable, so you can fit that oversized pasta pot on the bottom rack. No wasting gallons of water hand-washing it.

Not just clean. Really clean.

The NSF-certified Sanitize feature ensures dishes are 99.9% hygienically clean. Just the thing to add more peace of mind to the day.

WiFi enabled.

Beko dishwashers are compatible with the HomeWhiz smart home app, allowing users to control their dishwasher from anywhere.

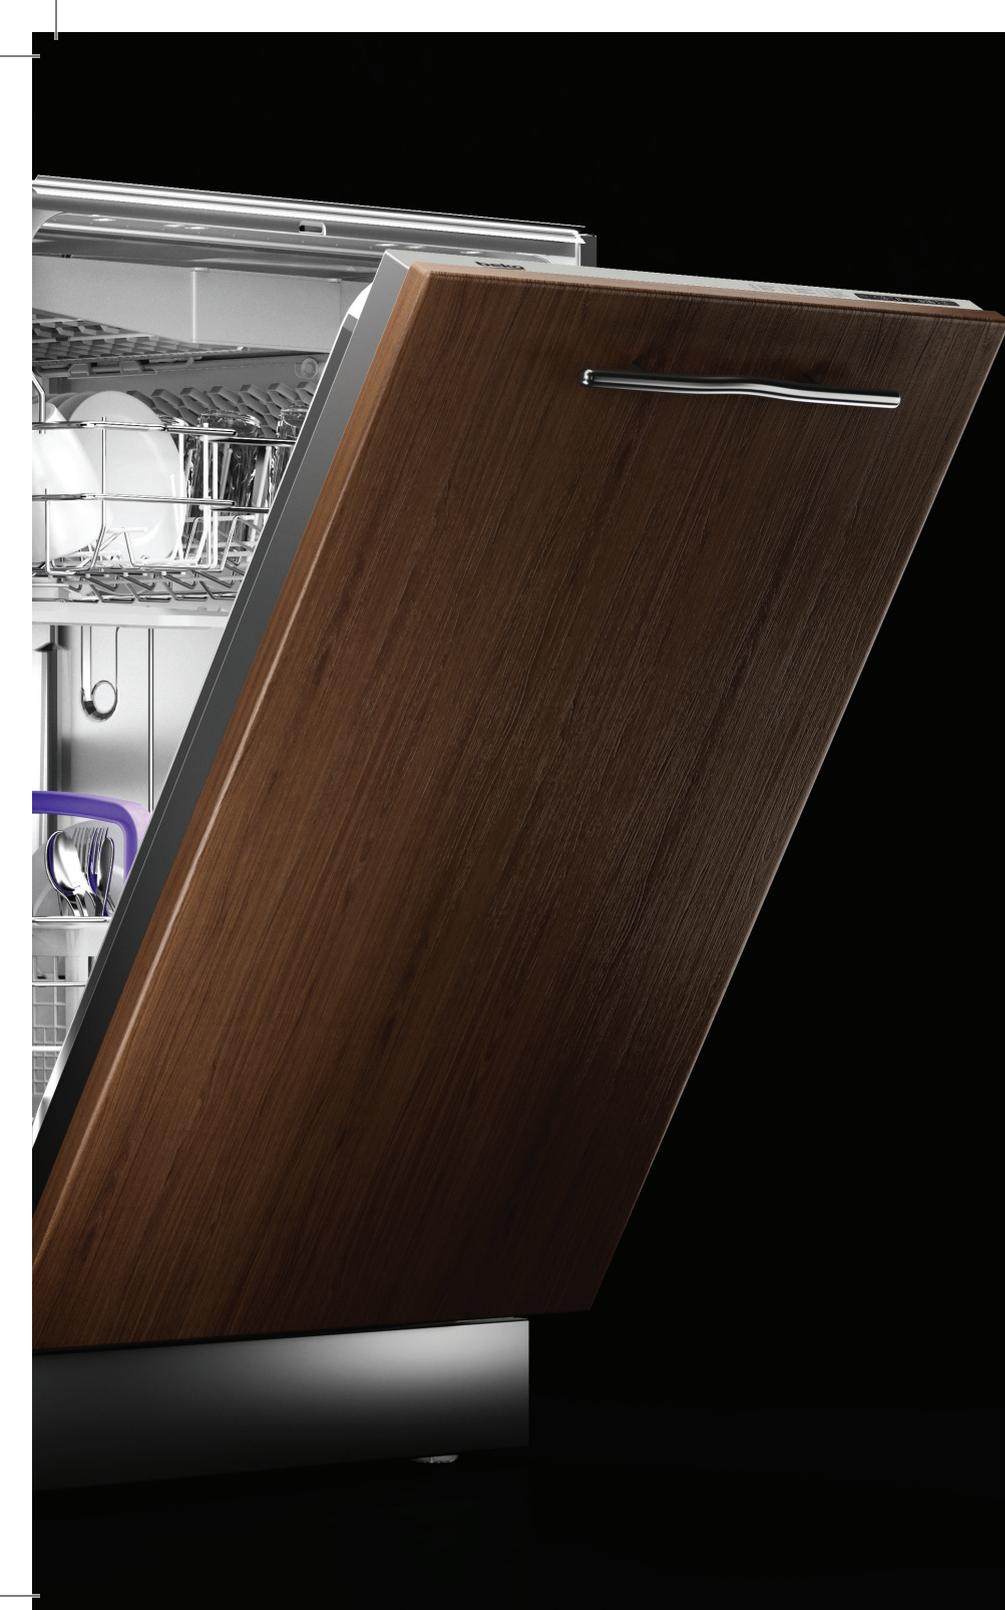

Save water, save energy.

Our high level of performance is achieved with minimal water and energy usage, helping to keep our planet as beautiful as your dishes. All Beko Dishwashers are ENERGY STAR Most Efficient certified.

**Introducing the planet's next best friends:
The Beko 2022 dishwashers.**

Custom Panel Dishwashers

Beko offers advanced performance and efficiency in several models of custom panel dishwashers. With fully flush installation, they'll blend beautifully into your kitchen's custom cabinetry.

Beko custom panel dishwashers also feature industry-standard dimensions, making them ideal for replacement in existing cabinetry. Efficiency is possible in every kitchen.

Our product innovations don't stop with dishwashers.

We have a very long history of product innovations, even if you might not have heard of us. We're a 67-year-old company offering products in more than 140 countries. And although we're relatively new to the US market, we're the fastest-growing brand in Europe and the number one-selling brand in several countries. Our global manufacturing facilities have achieved a carbon-neutral rating, resulting in us being named the #1 Most Sustainable Home Appliance and Housewares Company in the World in 2021.*

Our new dishwasher line is the latest in a long history of innovative appliances for the home. These include refrigeration, cooking and laundry, all connected by a common vision to provide our customers, and our planet, with a healthier, happier place to live.

*Awarded to our parent company Arçelik in 2021 Corporate Knights survey
