HARVESTfresh™

Inspired by nature, powered by light

Even though they keep looking fresh, fruits and vegetables start to lose their vitamins when placed in the fridge. Thanks to innovative **HarvestFresh™** technology, vitamins are preserved for longer*. Unique crisper technology developed for Beko fridges uses not one, but 3 efficient colours, that mimic the 24 hours sun cycle and natural sunlight. All of this so you can enjoy nutritious meals and a healthier lifestyle.

**Tested by Intertek based on Vitamin C and Vitamin A measurements in tomatoes, green peppers, carrots, spinach, celery, parsley, coriander, red peppers and kale directly exposed to the light technology compared with Day 0 conditions over a 5-day period.*

AEROperfect™

Up to 30% longer freshness

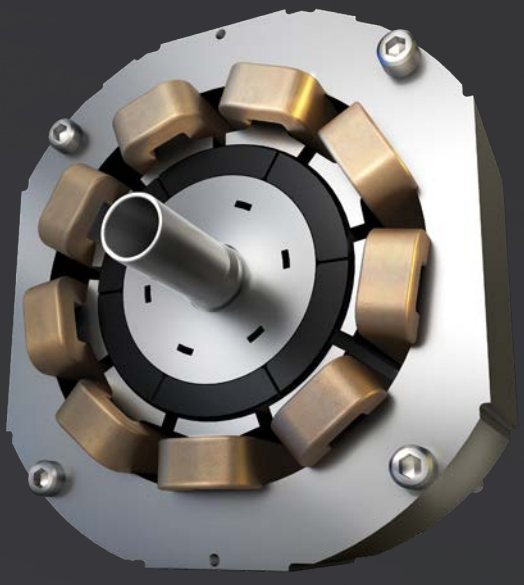

When it comes to keeping your food fresh, crispy, and as delightful as the moment you bought it, your fridge freezer plays a starring role. This isn't new information for any of us. But, as they say, not all heroes wear capes! Some, like the Beko fridge freezers, come equipped with an innovative feature known as **AeroFlow™**. In Beko fridge freezer, this feature is a sophisticated cooling technology that ensures uniform air circulation throughout the appliance, maintaining consistent temperatures and humidity levels. This feature helps keep food fresher for longer by preventing hot spots and frost buildup.

Holiday Mode Function

Going away on holiday

This feature reduces the amount of power the appliance uses by stopping the fridge compartment from functioning. Empty the compartment and select Hoilday Mode whenever you go away. The other compartments will continue to be cooled according to their set temperatures.

ProSmart Inverter Compressor

High efficiency. Long-lasting durability. Ultra-quiet performance.

Beko's **ProSmart™ Inverter Compressor** keeps your fridge running efficiently, even if you're constantly opening the door. It adjusts the cooling power based on how often the door is opened, helping to maintain a consistent temperature and keeping your food fresher for longer. This smart technology uses less energy, saves you money, and operates up to four times quieter than a standard fridge compressor, so your home stays peaceful while your fridge works smarter.

GN0532B

91cm Dark Inox Side By Side Fridge

Specifications

- Energy Rating: A++
- Usable Volume: 521L
- Fridge Volume: 344L
- Freezer Volume: 177L
- Display: Electronic
- Door Colour: Brushed Dark Inox
- ProSmart Inverter Compressor (10 Year Warranty)
- No Frost Cooling
- Water Dispenser
- Half Length Flush Handle
- Door Open Alarm

- Fast Freeze

Dimensions

- Unpacked Dimensions: 1775 x 540 x 545 mm (H x W x D)
- Packed Dimensions: 1854 x 575 x 600 mm (H x W x D)

Cooking

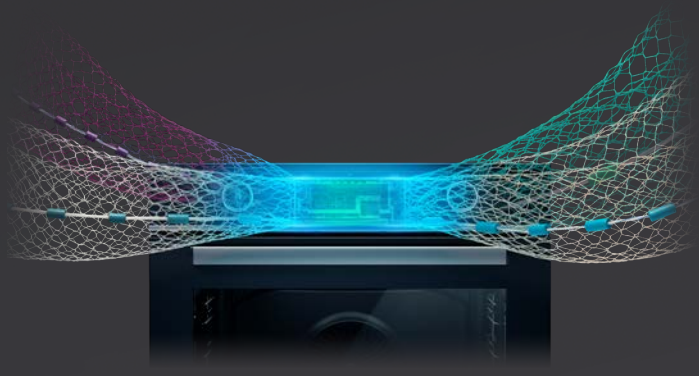

AEROperfect™

Perfect hot air distribution, meals cooked to perfection.

When hot air isn't evenly distributed throughout your oven, you end up with food burnt at the edges or uncooked in the middle. **AeroPerfect™** technology takes its inspiration from aircraft designs, an industry which understands aerodynamics better than any other. Using this expertise, **AeroPerfect™** uses a constant stream of even airflow all around the oven, all the while minimising temperature fluctuation, so your food is cooked to absolute perfection every single time. All you need to do is to put your food in the oven and enjoy the perfect results!

Recycled Net

Discarded fishing nets represent a fundamental danger for marine life, being solely responsible for a staggering 300 000 dead or maimed sea creatures. To combat this threat, Beko used 71 tons of recycled fishnets and industrial thread waste in 2019 & 2020, transforming them into the new materials that go into our **RecycledNet™** ovens. The result is a highly durable and sustainable product with no compromise in quality, that simultaneously helps keep our oceans clean and preserves our marine life. Food for thought, we'd say.

SteamAid Oven™

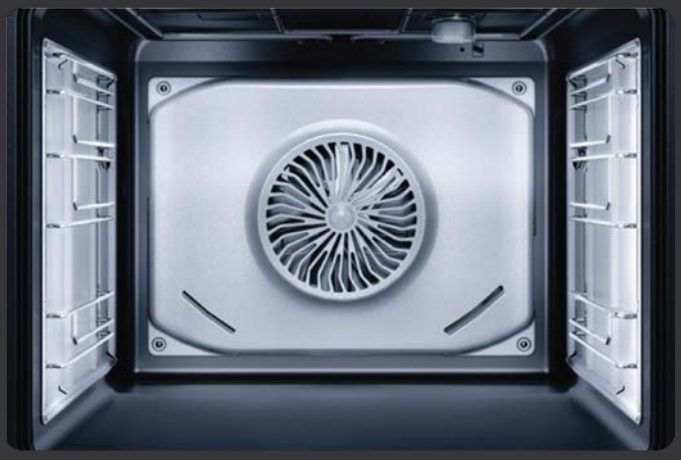

Tender on the inside, crispy on the outside

Beko ovens with the **SteamAid™** feature helps you cook delicious homemade pastries, and also helps you get vegetables, meat and fish crispy on the outside and moist in the middle. During the cooking cycle, steam is injected into the oven cavity based on the selected cooking program, or it can be injected manually up to 3 times. So, no more dried out turkeys, chewy roasts or crusty casseroles.

Catalytic Walls

Grease-absorbing walls

Scrubbing the oven with strong cleaning products is nobody's idea of fun. **Catalytic walls** in your oven's back and side walls use clever science to absorb cooking grease and reduce food odours. So, you can save that elbow-grease for something a little more enjoyable.

BBDF26300X

60cm Stainless Steel Multifunction Built-In Double Oven

Specifications

- Energy Rating: A
- Usable Volume: 38/75L
- Timer: Digital
- Handle: Square Inox
- Oven Door: Removable Inner Glass

Accessories:

- 3x Wire Shelves with Standard Tray
- Deep Tray

Added Features and Functions

- Simple Steam Cleaning
- Side Racks (2/5 levels)

Top Cavity Functions

- Conventional Cooking
- Bottom Heating
- Electric Grill

- Packed Dimensions: 655 x 533 x 536 mm (H x W x D)

SmartFit

Beko's **SmartFit™** hobs offer up to 17% more usable cooking surface area while seamlessly fitting into a standard 60 cm countertop cut-out. Designed for effortless installation, it requires no additional kitchen modifications, providing maximum convenience and versatility for your cooking needs.

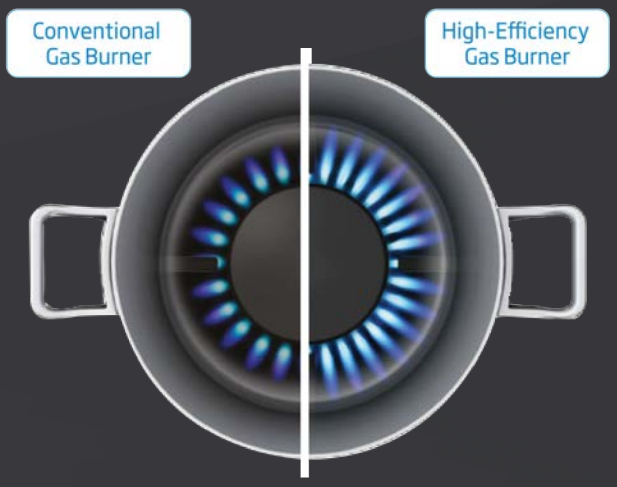

PractiClean

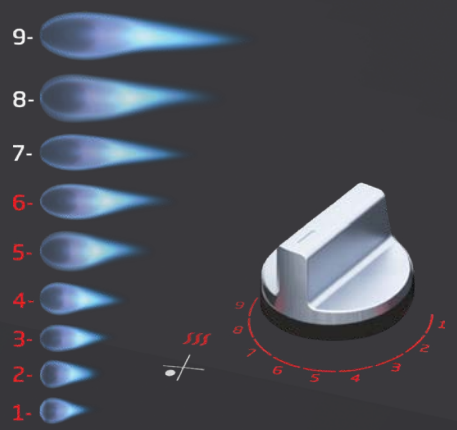

Equipped with an advanced Nano Coating, the **PractiClean™** Hob is designed for effortless cleaning, significantly reducing the time and effort required compared to standard hobs. Its surface is highly resistant to scratches and fingerprints, maintaining a pristine appearance with minimal maintenance.

High Efficiency Gas Burners

Faster and more efficient cooking with special burner design

Don't let a busy day cost you a healthy meal. Now you can cook every meal faster and more efficiently on the hob. **High Efficiency Gas Burners** use less gas and cook more quickly than standard burners. So even when you're short on time, you put your favourite meals on the table fast.

FlameAdjust

Beko's innovative **FlameAdjust™** technology provides precise control with nine distinct flame power levels for each burner on your gas hob. This allows for accurate temperature adjustments, ensuring consistent cooking results while enhancing safety by reducing the risk of overheating or accidental flare-ups.

MACM90BG

90cm Gas on Glass Hob Black

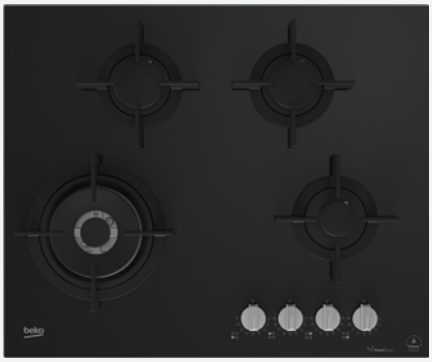

Specifications

- Hob Type: Gas on Glass
- Burners: 4 + 1 Wok
- 1kW, 2x 1.75kW, 3kW, 4kW
- Integrated Ignition
- Continuous Cast Iron Pan Supports
- Flame Failure Safety Device

Dimensions

- Unpacked Dimensions: 105 x 895 x 525 mm (H x W x D)
- Packed Dimensions: 180 x 1010 x 645 mm (H x W x D)

MACM11B

65cm SmartFit Black Gas on Glass Hob

Specifications

- Hob Type: Gas on Glass
- Burners: 3 Burners + 1 Wok(5 kW)
- Cast Iron Pan Supports
- Flame Adjust Levels: 9
- PractiClean
- High Efficiency Gas Burners
- Flame Failure Safety Device (FFSD)
- Integrated Ignition

Dimensions

- Unpacked Dimensions: 51 x 646 x 524 mm (H x W x D)
- Packed Dimensions: 190 x 730 x 620 mm (H x W x D)

HIC64401

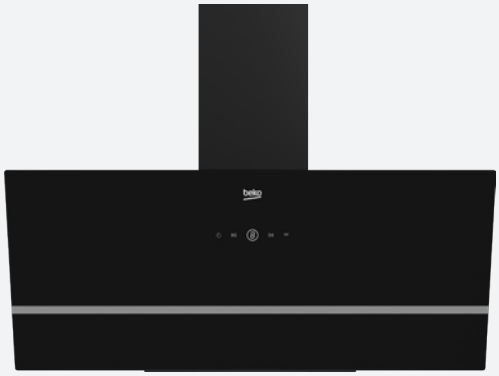

60cm Black Glass Vitroceramic Hob

Specifications

- Hob Type: Vitroceramic
- Vitroceramic Plates: 4
- Digital display
- Cooking Levels: 9
- Residual Heat Indicators
- Automatic Shut-off
- On-off Indicator light
- Overflow Safety for control unit
- Overheat Safety System

Dimensions

EnergySpin

Save in all programs, not just eco.

Don't you want to use less energy when doing your laundry, not just in eco-friendly programs but in all programs*? Beko's **EnergySpin** technology offers just that. Through specific drum movements, this cutting-edge technology accelerates detergent dissolution, ensuring flawless washing results with less heat, ultimately minimizing energy consumption in frequently used programs. This way, Beko washing machines can save up to 35% more energy in frequent programs compared to traditional machines, all while maintaining washing performance and contributing significantly to a sustainable future.

Disclaimer: In addition to the Eco 40-60 program (declaration program) the energy consumption of Cottons, Synthetics, Xpress/Super Short, Delicates, Mix, Handwash, Wool, Darkcare, and Outdoor/Sports programs is up to 35% less compared to the Beko WTV 9636 XS0 washing machine, without compromising washing performance. EnergySpin is also available in Coldwash, 20°C, Drum Clean, and Downloaded programs.

Recycled Tub

There are many things that nature calls her own however, PET, the main material that goes in plastic bottles and hundreds of other modern materials, is not one of them, being solely responsible for millions of tons of waste that nature can't ever break down. In our drive to help the planet, we used 398 tons* of recycled plastic bottles in 2019 & 2020, transforming them into a durable, high-performance material that goes into the build of Beko's **RecycledTub™** washing machines and washer dryers. So you get the highest level of performance and durability while the planet breathes a little easier.

Wash & Wear

1kg washed and dried in just 1 hour

Running late and your favourite shirt is still in the laundry basket? No stress. With the **Wash&Wear®** program in your Beko washer dryer, you can wash and dry up to 1kg of laundry (around 5 shirts) in just one hour. Choose a gentle temperature between 20˚C - 30˚C, pop your outfit in the machine, and by the time you're ready, so are your clothes; fresh, clean, and dry. Perfect for those last-minute plans.

IRONfinish

Ironing technology inside, ready to wear clothes outside!

Ironing your clothes everyday can be tiring. Beko's **IronFinish** Dryers take care of the hassle for you, getting your clothes completely dry and ready to wear. It even works the same as a regular iron, infusing water and steam into your clothing for the ideal time at the ideal temperature, so fabrics come out smooth and ready to wear, just as if you'd ironed them! Let your dryer do your ironing for you so you can get on with the more important things in life!

Dishwashers

beko

SaveWater

Same Perfect Results with 27% Less Water Consumption

You do not have to sacrifice washing performance in order to clean more affordably and sustainably. Beko's **SaveWater** technology allows you to clean perfectly while using 27% less water. In Beko **SaveWater** dishwashers, the last perfectly clean rinse water is collected and stored in a tank in a totally hygienic way to be reused in the next wash cycle. The Beko **SaveWater** dishwasher uses 7 litres of water instead of 9.5 litres, saving 2.5 litres of water per cycle. This way, you'll use less water in the next wash cycle and save money every time you wash. Without losing any of the washing performance!

HygieneShield™

Purifying power of high temperatures for 99.999% hygiene

The steam mist rises up from these high temperatures to cover every inch of the dish. Then the dishes are rinsed with purifyingly hot water. All this means that 99.999% of bacteria and viruses* are completely eliminated for perfectly hygienic results.

** Killing; Enterococcus faecium, Bovine Coronavirus, Murine Norovirus*

ProSmart Inverter Compressor

Intense cleaning performance for the dirtiest dishes

Beko's dishwashers with the **ProSmart Inverter** combines smart technology with energy efficiency, quiet performance and long-term reliability. The advanced motor operates smoothly and adjusts power based on the load, helping you save electricity and water without compromising on spotless results. Designed to reduce noise and energy use, it is perfect for homes that value convenience, performance and sustainability all in one appliance.

Fast+Function

Cleans dishes and glasses in a flash

Sometimes you don't have time to wait for a full wash cycle to run before you have clean plates and glasses. The **Fast+** function makes the washing cycle faster up to 3 times* with optimum performance, meaning you can wash and serve in no time at all.

Half Load

This feature allows you to use either the upper or lower basket independently, reducing water and energy consumption without compromising cleaning performance. It's an ideal way to save resources and achieve spotless results, even with smaller loads.
