

DIMENSION	MEASURE		DIMENSION	MEASURE	
APPLIANCE			MIN Depth of rear opening required with oven.	45	mm
Product width	770	mm	MIN AREA of rear opening required with oven	247.5	cm²
Product depth	510	mm	MIN distance from cabinet to rear wall, with oven	20	mm
Radius of product corner	10	mm	Indicates whether a ventilation opening in the top front side of cabinet is needed or not with oven. Default is "N"	No	
Product height (MAX protrusion from the worktop)	4	mm	MIN Frontal gap required, with oven (2)	0	mm
Underneath the bearing area of the appliance	50	mm	MIN frontal opening area required with oven	0	cm²
Distance between cut out and top frontal projection	15	mm	WITH CABINET		
Distance between cut out and top lateral projection	10	mm	MIN worktop thickness with cabinet	12	mm
Plateau thickness	4	mm	MAX worktop thickness with cabinet	0	mm
Gas outlet positioning	N/A		Indicates whether a protection tray against heat or contact is needed. Default is "Y"	Yes	
Gas outlet X positioning	0	mm	MIN distance from bottom line of appliance to protection tray	10	mm
Gas outlet Y positioning	0	mm	Indicates whether a ventilation opening in the tray is needed or not with cabinet	Yes	
Power cable	With product		Recess dimension X	90	mm
Power cable positioning	Rear left		Recess dimension Y	120	mm
CUT OUT			Positioning dimension X by axis	45	mm
MIN front distance from cut-out to end worktop	0	mm	Distance of the tray from the back panel/wall	70	mm
MIN rear distance from cut out to wall/furniture	35	mm	Indicates whether a divider is available	Service accessory	
MIN lateral distance from cut out to wall/furniture	100	mm	Indicates whether a ventilation opening in the back side of cabinet is needed or not. Default is "Y"	Yes	
MIN height from worktop to above furniture	400	mm	Indicates the position of the opening in the back side of the cabinet.	Top	
MIN cut out width	750	mm	MIN Width of rear opening of the cabinet	550	mm
MAX cut out width	752	mm	MIN Depth of rear opening of the cabinet	45	mm
MIN cut out depth	480	mm	MIN AREA of rear opening of the cabinet	247.5	cm²
MAX cut out depth	492	mm	MIN distance from cabinet to rear wall	20	mm
MIN cut out radius	0	mm	Indicates whether a ventilation opening in the top front side of cabinet is needed or not. Default is "N"	No	
MAX cut out radius	10	mm	MIN Frontal gap of the cabinet	0	mm
FLUSH INSTALLATION			MIN frontal opening area of the cabinet	0	cm²
Indicates whether a flush installation is possible. Default is "N"	Yes		INSTALLATION SPACE		
MIN Milling rabbet width	773	mm	Depth of immersion underneath the appliance	0	mm
MAX Milling rabbet width	775	mm	Width protruding area below bottom box	0	mm
MIN Milling rabbet depth	513	mm	Depth protruding area below bottom box	0	mm
MAX Milling rabbet depth	515	mm	Protruding area: X positioning	0	mm
Milling rabbet thickness	6	mm	Protruding area: Y positioning	0	mm
Radius milling rabbet	11.5	mm	ACCESSORIES FOR INSTALLATION		
Flush installation KIT (2)	Service KIT		Gasket	Pre assembled	
Indicates the minum worktop thickness with standard installation for gas	0	mm	Clips	Separate KIT	
Indicates the maximum worktop thickness with standard installation for gas	0	mm	Injector KIT	N/A	
Indicates the minum worktop thickness with flush installation for gas	0	mm	Elbow KIT	N/A	
Indicates the maximum worktop thickness with flush installation for gas	0	mm	COOKTOP HOOD INSTALLATION ONLY FOR GAS		
WITH OVEN			MIN distance from cooktop to above furniture	0	mm
Indicates whether the cooktop can be installed above oven. Default is "Y"	Yes		MIN distance between cabinets above the cooktop	0	mm
MIN worktop thickness with oven	28	mm	MAX distance between cabinets above the cooktop	0	mm
MAX worktop thickness with oven	0	mm			
Indicates whether a protection tray against heat or contact is needed with oven. Default is "N"	No				
Indicates whether a ventilation opening in the back side of cabinet is needed or not with oven. Default is "Y"	Yes				
Indicates the position of the opening in the back side of the cabinet with oven	Top				
MIN Width of rear opening required with oven	550	mm
