The values which are declared in the markings affixed on your appliance or other printed documents supplied with it represent the values which were obtained in the laboratories pursuant to the pertinent standards. These values may vary according to the usage of the appliance and ambient conditions.

## 3 Operation

### 3.1 Intended use

The appliance was designed for household use and is not suitable for industrial use.

### 3.2 Inserting/removing the hose

1. Push the hose nozzle (10) in the arrow direction into to the hose inlet (5).

- The fasteners on the hose nozzle (5) should click into position.
2. Press the fasteners on the hose nozzle (10) in order to remove the hose (5).

### 3.3 Inserting/removing the telescopic tube

1. Insert the telescopic tube (14) into the end of the handle (16).
2. Pull the telescopic tube (14) from the handle (16) to remove it.
3. Push the height setting switch (14) in the arrow direction and pull from its end in order to adjust the length of the telescopic tube (13).

### 3.4 Attaching/removing the parquet/carpet brush

1. Attach the telescopic tube (14) to the parquet/carpet brush (12).
2. Pull the telescopic tube (14) from the parquet/carpet brush (12) to remove it.

### 3.5 Adjusting the parquet/carpet brush

Shift the latch (11) on the parquet/carpet brush (12) or;

- to "|||||" position for hard floors and parquet.

- to "◇" position for carpets and rugs.

### 3.6 Operation

1. Pull the plug behind the appliance and plug it in the socket.
2. Press the ON/OFF button (3) to start or stop the appliance.

## 3 Operation

### 3.6.1 Adjusting the suction power

You can adjust the suction power using the + / - keys of the touch control panel (1) found on the vacuum cleaner.

1. Use your appliance at level  to clean sofas.
2. Use your appliance at level  to clean curtains and table cloths.
3. Use your appliance at level  to clean carpets.
4. Use your appliance at level  to clean rugs.
5. Use your appliance at level  to clean hard surfaces.

### 3.6.2 Suction power adjustment control

You can lower the suction power of the parquet/ carpet brush at a certain level by pulling backward the suction power adjustment control (15) located on the handle (16) without the need to use the control panel (1) found on the product.

### 3.6.3 Dust indicator

When your dust bag is full, all icons on the display and on the touch control panel (1) will start to flash simultaneously. Replace the dust bag.

## 3.7 Accessories

### Crevice tool

Suitable for cleaning "hard-to-reach" areas including spaces between chairs and furniture.

### Upholstery tool

Suitable for floors, cleaning stairways, automobiles, sofas and chairs etc.

**WARNING:** Do not use it by holding the outer end of the handle (16).

## 3.8 Hard floor brush

The hard floor brush (17) was developed for use on hard floors such as tile, ceramic, parquet, wooden floors etc.

It prevents potential scratches while cleaning hard floors thanks to its specially-developed soft hair.

### **3.9 Warnings regarding the energy label**

This is a general-purpose vacuum cleaner. In order to reach the highest energy efficiency and cleaning performance class specified in carpet and parquet cleaning, please use the regular high-performance parquet/carpet brush (12). The specified values regarding the energy label were determined according to the predefined measurement methods (in line with EN60312-1).

### **3.10 Turning off the vacuum cleaner and parking**

1. Turn off the device by pressing the ON/OFF button (3) and plug it out.
2. Wind the power cable by pressing the power cable winding button (2).

#### **Vertical parking**

Attach the hook of the parquet/carpet brush to the parking slot under the appliance.

#### **Horizontal parking**

Attach the hook of the parquet/carpet brush to the parking slot behind the appliance.

## 4 Cleaning and care

Before cleaning your appliance, turn off and unplug.

**WARNING:** Never use gasoline, solvent, corrosives, metal objects or hard brushes for cleaning your appliance.

### 4.1 Replacing the dust bag

When your dust bag is full, all icons on the display and on the touch control panel (1) will start to flash simultaneously. Replace the dust bag.

1. Open the upper cover (8) by pressing the button for opening the dust container (7).
2. Remove the dust bag from the bag holder by pulling it from its tray.

3. Dispose the full dust bag.
4. Holding its tray, push the new dust bag into the bag holder. Ensure that it is fully seated.
5. Close the upper cover (7) of the appliance.

**WARNING:** Do not force the upper cover (7) to close it, otherwise the plastic parts can be damaged.

**WARNING:** Dust bags not purchased from authorized dealers or services are not original. Such dust bags have a lesser quality and they become torn in a shorter period and render your appliance inoperable. Faults caused by using unauthentic dust bags are not covered by the scope of the warranty.

**WARNING:** Do not wash a dust bag.

### 4.2 Cleaning the filters

Motor protection filter

Sponge filter

HEPA filter

After 5 dust bag replacements (this number varies depending on the usage frequency and area), clean the filters.

While you empty the dust accumulated in the dust container to clean the container, you need to clean the motor protection filter, the foam filter and HEPA filter as well.

**WARNING:** For drying filters, do not use appliances such as hairdryers, stoves or other sources of hot air.

**WARNING:** Do not mount back the filters before they are dried properly; otherwise a smell of humidity may disseminate on the air, water may splash from the rear part or filters may get damaged.

**WARNING:** Put the filters back to their original place when they are dry.

## 4 Cleaning and care

### 4.2.1 Motor protection filter

1. Open the upper cover (8) by pressing the button for opening the dust container (7).
2. Push the filter cover latches towards the arrow direction shown to open up the filter lid.

3. Remove the sponge from its caging.
4. Shake off and rinse it with water. After rinsing, gently squeeze the sponge.

### 4.2.2 Sponge filter

1. Push down the rear cover opening latch to open the cover.
2. Remove the sponge placed on the back of the lid to rinse it.

3. After rinsing, gently squeeze the sponge.

### 4.2.3 HEPA filter

1. Press the rear lid button to open and remove the HEPA filter.

2. Shake off and rinse it with water.
3. Leave the HEPA filter for drying after rinsing.

### 4.3 Storage

- Store the appliance carefully when you do not want to use it for a long time.
- Plug out the appliance.
- Keep it away from children.
