## Outstanding Features

### EverFresh+

With meticulous temperature management and precise humidity control, our EverFresh+ technology keeps fresh food fresher three times longer than the average refrigerator – for up to 30 days! \*

\* Tested by SGS (compared to standard crisper for broccoli and lettuce)

### Active Fresh Blue Light

Fruits and vegetables stay fresh up to 30% longer, and retain vitamins and nutrients with this amazing new technology that simulates natural lighting conditions, extending the photosynthesis process into your refrigerator.

### NeoFrost Dual Cooling Technology

Between unloading the grocery bags and getting ready to prepare a meal, you probably don't spend a lot of time thinking about the food in your refrigerator or freezer. And that's okay, because here at Beko, we do. That's why we've developed our NeoFrost dual cooling technology to ensure your food stays fresher, longer.

Unlike conventional single cooling systems, NeoFrost cools twice as fast with two separate cooling systems that maintain optimal humidity in the fridge, while keeping the freezer dry and frost-free.

### ProSmart Inverter Compressor

The kitchen is a gathering place for your family. It's where plans are made and stories are shared. We've engineered the ProSmart inverter compressor to make sure our refrigerator never interrupts the conversation. As a matter of fact, the ProSmart compressor runs four times quieter than other refrigerator compressors. And the energy-efficient ProSmart compressor also meticulously maintains a consistent temperature to keep food fresher, longer.

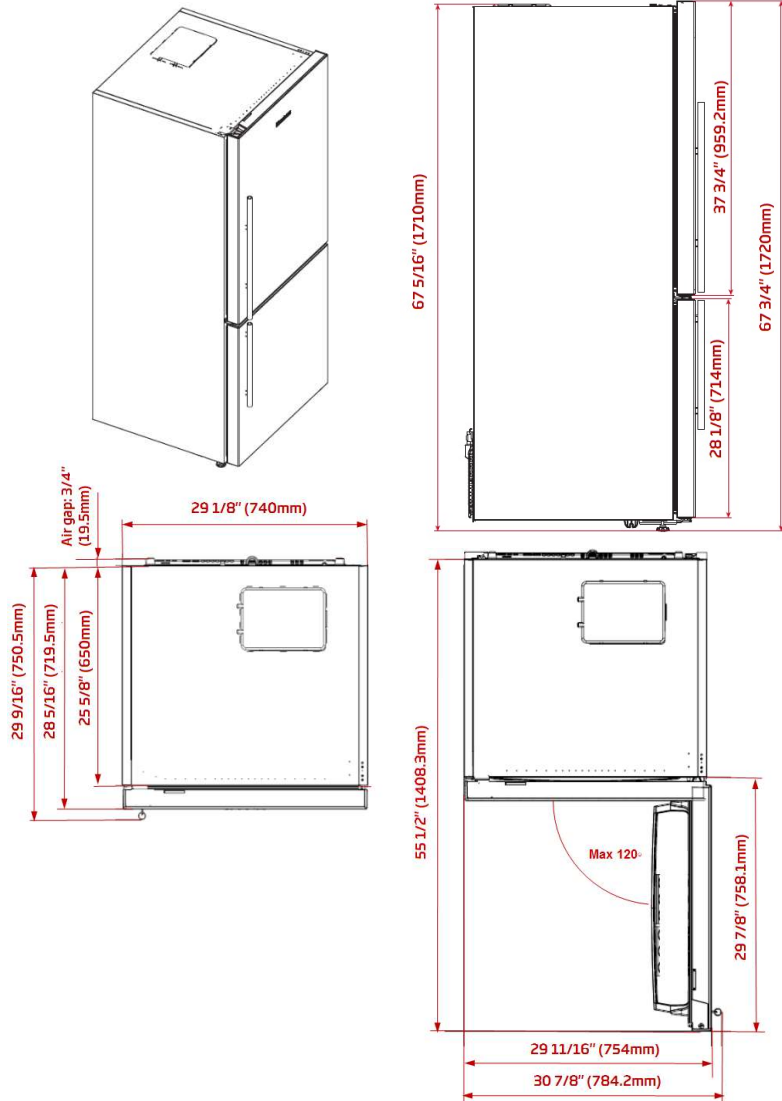

### Automatic Ice Maker

Beko Automatic Ice Maker can generate 6 pounds of ice per day avoiding the need to fill old fashioned ice trays by hand.
