30 INCH PRO-STYLE INDUCTION RANGE

PRIR34450SS

Outstanding Features

Professional Design

Your range is the warm heart of your home and the focal point of your kitchen. That's why we're proud to announce that our beautiful, functional range designs have earned several IF Design and Red Dot awards. Featuring large knobs with state-of-the-art illumination, distinctive bull nose and handles, cast iron continuous grates, we understand that having a high performance, professional-style range makes it a lot easier to cook like a pro.

Surf Cooking

Beko Surf® Convection takes the guesswork out of multi-level cooking. No more worries about uneven heat or rotating dishes from rack to rack. Our Surf Convection technology blows hot air through side wall holes in the oven cavity and through back wall to provide more uniform air circulation and cook foods more evenly, without flavors and aromas mingling. Plus, up to 30% faster cook times makes getting dinner on the table a snap.

XL Interior Volume 5.7 cu. ft.

For the cook who enjoys some extra elbow room, Beko's oven interiors are among the most spacious in their class. With an industry-leading 5.7 cu. ft. interior volume, you'll have more than enough room for that big Thanksgiving turkey. So this year, invite the whole extended family.

12" XL Cooking Zone

Whoever said a watched pot never boils never cooked on a Beko range. Enjoy faster boiling and more efficient cooking in any size pot, courtesy of our extra-large cooking area.

Induction Cooking Zones

Superior technology allows you to cook foods faster and more safely by using the reaction between a rapidly cycling magnetic coil and the iron atoms in your steel cookware to create heat.

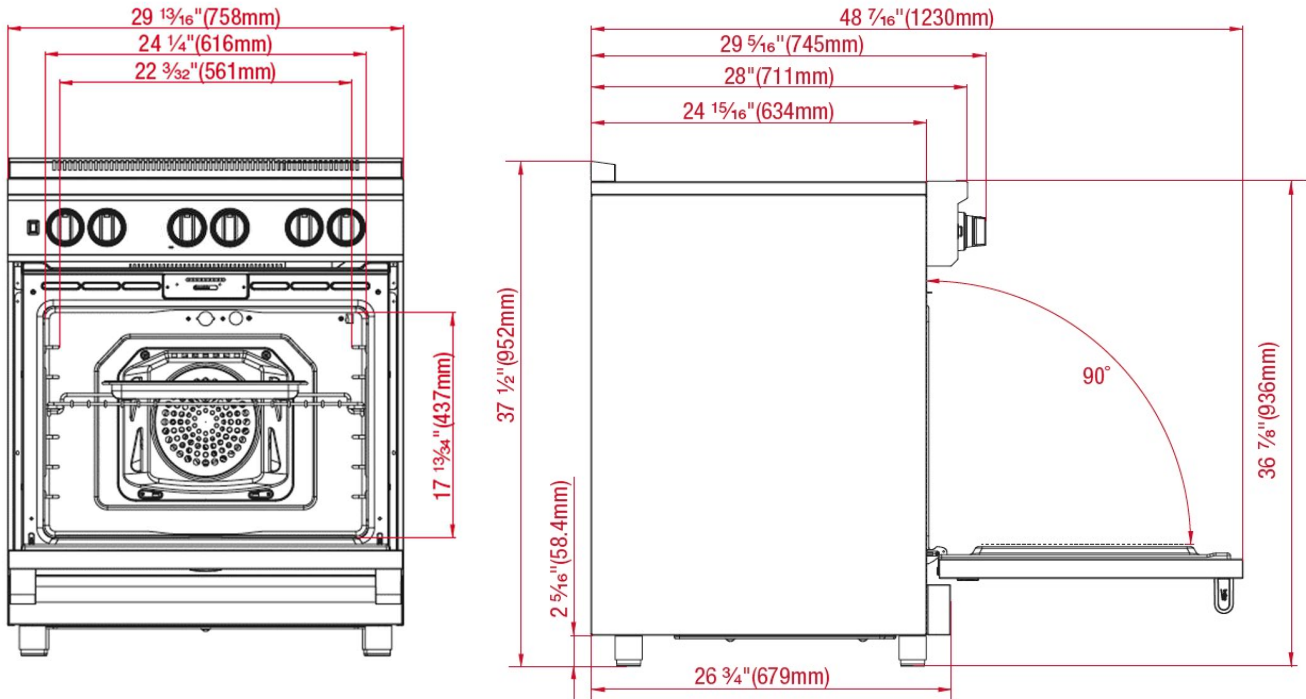

Self-Clean

Even if you love to cook, you probably don't love to clean your oven. Save time and energy with Beko's self-cleaning function. Simply choose between three levels of self-cleaning, depending on how extensively your oven needs to be cleaned and the time available. Even your toughest stains will be reduced to a fine ash that's easily wiped away with a cloth, without the need for harsh detergents or chemicals.
