PREMIUM TECHNOLOGY

ACTIVE FRESH BLUE LIGHT™

Fruits and vegetables stay fresh up to 30% longer, and retain vitamins and nutrients with technology that simulates natural lighting conditions, extending the photosynthesis of fruits and vegetables stored in your refrigerator.

NEOFROST™ DUAL COOLING TECHNOLOGY

NeoFrost™ Dual Cooling's separate cooling systems for each compartment maintain ideal air flow and optimal temperatures with a high level of humidity in both the freezer and the fridge.

FREEZE GUARD

Beko Freeze Guard technology uses an inverter compressor and electronic temperature control system to ensure the freezer continues to work in ambient temperatures as low as 5° F, without any loss of performance.*

*The fridge compartment will not work properly in low temperatures, so we recommend you only use the freezer compartment in low ambient temperatures.
