### Hob Extractor

Cooking and ventilation are combined in one great two-in-one solution.

Cooking and ventilation are combined in one great two-in-one solution.

### ProSmart Hood

Less noise, more savings

Now you can savour the joy of cooking without the lingering odours or a roaring hood. The ProSmart hood removes unwanted smells and smoke from your kitchen quietly, so you can focus on cooking. Plus, superb energy efficiency means lower bills!

### Low-Noise Operation

Standard ventilation, less noise

Don't let the noise of your hood drown your kitchen chit-chat. Thanks to its special-coating insulation, Low-Noise Operation reduces extraction noise by up to 7 dBA. So, now there's no need to choose between conversation and a fresh kitchen!

### Intensive Ventilation

Ventilation boosting performance

Grilling and frying can create a lot of smoke and strong odours, making your kitchen an unpleasant place to be. Intensive Ventilation increases maximum extraction power by 67%\* and quickly gets rid of smoke and smells. After a while it automatically switches back to the previous speed setting, which is pretty handy too! \*Tested by internal laboratories

## IndyFlex

### Flexible cooktop to match your pans

Finally, a cooktop that accommodates any meal. Whether you're making small dishes or a large menu, the IndyFlex hob can handle it. These flexible cooking zones combine to create larger ones, so you can use 4 pans or 2 larger ones to make whatever strikes your fancy.

## Power Management

### Easily-set max energy consumption

Do you get lower energy tariffs at certain times during the day? Then, you need to know how much energy you're using. Thanks to Power Management function, you can set limits on the energy consumption of your hob during installation. You can choose between 5 levels and then reset it whenever you wish.
